Third annual Global Technology Code-a-Thon

Student kick-off call

Featuring: NSBE, SHPE and SWE

We are committed to ensuring recruitment and hiring practices and decisions meet the inclusive needs of our business and creating a workforce where everyone has the opportunity to achieve their career goals

BANK OF AMERICA

2025 Code-a-Thon overview

Results

The 2025 Code-a-Thon was an incredible success. Teams addressed a broad array of non-financial industry issues and created solutions that reflected the diversity in thought and skills these students had to offer.

Two-phased Code-a-Thon

1 Virtual Code-a-Thon

- Teams were given seven days to develop a “Working Prototype“ of their solution.
- Bank of America selected semi-finalists from each school.
- Winners were invited to Bank of America headquarters in Charlotte to compete

2 In-person finalist competition

- Winners from each school were given an opportunity to compete against the other schools for top accolades. They were took part in:
  - Tours of SOACC/CTOC
  - Metaverse demonstrations
  - Better Money Habits sessions
  - Executive leadership/Recent TAP hire networking
  - Overviews and demonstrations of solutions
  - Awards ceremony

Participation: Nine schools participated in the Code-a-Thon: Howard University, Johnson C. Smith University, Tennessee State University, North Carolina A&T, UNC Charlotte, Rutgers University, New Jersey Institute of Technology, Kennesaw State University, and University of Texas, Arlington.

Participant Feedback: Grateful to Bank of America for an enriching experience diving into the intricate supply chain dynamics! From tech sector insights to cross collaboration, tours, leadership sessions, case competition and even exploring the metaverse, every moment broadened my horizons.

Bank of America Global Technology is hosting its third annual Code-a-Thon!

Participating teams will have the opportunity to showcase their technical skills to provide real-world, non-banking software solutions to issues relevant to the college experience.

Participation	Format	Key dates

• Participation: Open to all active and enrolled students at participating schools who plan to pursue a career in technology.
• Teams may have up to four members with one or more freshmen or sophomore level students.
• Schools may host up to five individual teams.
• Teams will choose one of six themes.
• Each team in the coding competition will be given 14 days (including the weekend) to develop a working prototype, PowerPoint presentation and video.
• All solutions/working prototypes will remain the property of the students.
	• Code-a-Thon will consist of two phases:
	• **Phase one** - 14 Day (virtual) semi-finals
	  • Teams will submit solutions to Bank of America.
	  • Bank of America will select one team per school for final competition.
	• **Phase two -** In-person finals
	  • *In person at Bank of America Charlotte headquarters
	  • Networking with Global Technology executives and recent new hires
	  • Hands on virtual reality and the Metaverse experience
	  • Teams overview and demo solutions
	  • Finalist awarded
		• Registration open: **Feb. 16-20**
		• Virtual kickoff: **March 2-6**
		• Phase one: **March 9-23**
		• Reporting/judging: **March 23-27**
		• Semi-finalist notifications: **March 23-27**
		• Phase two: **April 21-24**

**Travel and lodging for finalists will be provided by Bank of America*

Themes | Challenges | Judging | Presentation | Submission

Campus innovation
Solution should address creating or improving a critical needs service provided by the university

Connections
Solution should aid in building networking opportunities and/or professional relationship development

Student safety
Solution should address improving student safety concerns on or off campus

Funding the dream
Solution should aid students in identifying grant, scholarship and/or internship opportunities

Career exploration
Create vehicles to examine career options that exist within the technology field

Financial wellness
Focused on managing resources effectively and planning for the future

Judging criteria

- **Innovation:** Solution involves a new or unique approach
- **Technical solution:** Demonstrates a variety of coding skills with well-designed logic and code structure
- **Functionality:** How well the solution performs its intended task (core features, I/O, and error handling, efficiency, user experience)
- **Presentation:** How well the team presents their issue, approach and solution
- **Visual appeal:** How visually polished or complete is the solution

Presentation

- Five slide (**5-10** minutes maximum) PowerPoint presentation followed by Q&A
  - Team member introductions and career goals (brief)
  - Overview of approach (focus on coding/technology utilization and the “why”)
  - Highlight technical challenges and resolutions
- Provide **1-2** minute video overview of the issue being resolved and why it’s important to address (executive summary) along with a **brief demonstration of the solution**

Submission requirements

- **Solution package submission deadline:** All material must be received by Bank of America by **5 pm. Eastern on March 23** via the submission link**.**
- **Solution package:** The solution package should consist of a PowerPoint presentation that outlines the issue, an executive summary of why it’s important to solve and the approach and technical challenges faced. In addition, team must include a 1-2 minute video that introduces the team and explains its solution.
- **File formats:** PowerPoint presentations should be converted to PDF format; video files should be converted to MP4 format.
- **Submission process:** Formal communication will be sent for submission process.
